PROFESSIONAL SUMMARY

Motivated Computer Engineering student with a passion for driving results and a strong analytical mindset, eager to apply problem-solving skills to sales and marketing challenges. Possessing experience in project development and data analysis, I am keen to contribute to lead generation, market research, and impactful marketing campaigns for sustainable initiatives.

TECHNICAL SKILLS

Languages:

Backend & Databases: ,

Frameworks & Tools: , Flutter, React Native,

EXPERIENCE

Software Development Intern

July 2023 – Oct 2023

Infipre IT Services (OPC) Pvt. Ltd

- Developed dynamic web applications and CRM modules, enhancing customer relationship management capabilities and supporting potential sales processes.
- Streamlined user interaction through UI improvements and robust validation in a file upload system, indirectly improving user engagement and data quality for potential marketing insights.
- Collaborated effectively in an agile team, contributing to feature development and testing, demonstrating strong teamwork and project execution skills relevant to campaign implementation.

Software Engineering Intern

2024

Vyom Solutions

- Contributed to the development and refinement of internal software tools, ensuring high standards that support efficient business operations and data analysis.
- Provided critical support in debugging and feature implementation, demonstrating problem-solving abilities and attention to detail essential for successful marketing campaign execution.

KEY PROJECTS

Open-Source AI Proctoring System

Jan 2024 – Present

Technologies: TensorFlow, OpenCV, MediaPipe, FER

- Developed an AI-based system to monitor user behavior, demonstrating analytical skills in identifying patterns and potential risks, applicable to market trend analysis.
- Integrated advanced detection features, showcasing innovation and attention to detail in creating a robust solution, valuable for developing impactful marketing strategies.
- Focused on optimizing system performance, reflecting a commitment to efficiency and delivering high-quality results, crucial for campaign execution and data processing.

AI-Powered Website Generator — CodeCraft AI

2024

Technologies: LLMs, Flask, React

- Developing an AI-driven platform to generate websites based on user requirements, highlighting an understanding of customer needs and product development.
- Designed backend APIs to manage user input and deliver tailored responses, demonstrating structured problem-solving and a focus on user experience.

ArogyaYaan — Medical Supply Chain System (Mumbai Hacks 2025)

Nov 2025

Technologies: Go (Gin), PostgreSQL (Supabase), Next.js, React Native

- Developed a medical supply chain platform, integrating an AI agent to optimize logistics and inventory tracking, showcasing process improvement and data-driven decision-making.
- Created a cross-platform mobile application for real-time monitoring, demonstrating ability to develop user-centric tools that enhance operational efficiency and data accessibility for sales teams.

EDUCATION

Goa Engineering College — Government of Goa

July 2024 – July 2027

Bachelor of Engineering (B.E.) in Computer Science

SGPA: 8.5

Government Polytechnic Panaji

2021 – 2024

Diploma in Computer Engineering

91.4%

ACHIEVEMENTS

- Winner — Brand Builder Battle (Ventura, Goa)** - Led development of HerbalEase

- **Finalist — Level Supermind Hackathon (Mumbai)**
- **Finalist — MumbaiHacks 2025**
- **3rd Place — TechYothon (AITD)** - AI-powered campus safety system
- **Recognition — Computer Vision Expo 2024 (Ready Tensor)** - ProctoringAI project
