PROFESSIONAL SUMMARY

Highly organized Computer Engineering undergraduate with strong communication and interpersonal skills, eager to leverage analytical abilities and project coordination experience in a Remote Recruiting Intern role. Proven capacity for managing complex processes, maintaining detailed trackers, and collaborating effectively to support candidate sourcing, screening, and pipeline management to achieve hiring targets.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, Go, PHP

AI/ML & Computer Vision: TensorFlow, OpenCV, MediaPipe, FER, Scikit-learn, Hugging Face

Backend & Databases: Flask, Node.js, REST APIs, SQL, MySQL, PostgreSQL, Firebase

Frameworks & Tools: React.js, Next.js, HTML, CSS, Flutter, React Native, Git, Linux, Data Structures & Algorithms, System Design Basics

EXPERIENCE

Software Development Intern

July 2023 – Oct 2023

Infipre IT Services (OPC) Pvt. Ltd

- Collaborated effectively in an agile team environment, contributing to feature development and testing, demonstrating strong teamwork and coordination skills.
- Managed the development and deployment of dynamic web applications, showcasing project execution and attention to detail in system implementation.
- Enhanced user experience and system efficiency by implementing improved validation and UI responsiveness, reflecting a commitment to quality and process improvement.

Software Engineering Intern

2024

Vyom Solutions

- Adhered to production-level coding standards in developing internal software tools, emphasizing meticulous attention to detail and process compliance.
- Provided critical support in debugging, feature implementation, and deployment, demonstrating problem-solving capabilities and commitment to successful project delivery.

KEY PROJECTS

Open-Source AI Proctoring System

Jan 2024 – Present

Technologies: TensorFlow, OpenCV, MediaPipe, FER

- Developed a real-time AI-based proctoring system using TensorFlow, OpenCV, and MediaPipe, demonstrating ability to build and manage complex detection systems.
- Integrated advanced features like facial emotion recognition (FER) to identify patterns, showcasing analytical problem-solving.
- Optimized video processing pipelines for efficiency, reflecting a focus on performance and structured execution.

AI-Powered Website Generator — CodeCraft AI

2024

Technologies: LLMs, Flask, React

- Designed and developed an AI-driven platform utilizing LLMs, Flask, and React to generate websites from user requirements, highlighting end-to-end project management.
- Implemented robust backend APIs for prompt orchestration and response handling, demonstrating structured system development.

ArogyaYaan — Medical Supply Chain System (Mumbai Hacks 2025)

Nov 2025

Technologies: Go (Gin), PostgreSQL (Supabase), Next.js, React Native

- Engineered a comprehensive medical supply chain platform using Go (Gin) and PostgreSQL (Supabase) for inventory and logistics tracking, showcasing system design and data management.
- Developed a cross-platform React Native mobile application for real-time monitoring and updates, demonstrating full-stack development and user-centric design.

EDUCATION

Goa Engineering College — Government of Goa

July 2024 – July 2027

Bachelor of Engineering (B.E.) in Computer Science

SGPA: 8.5

Government Polytechnic Panaji

2021 – 2024

Diploma in Computer Engineering

91.4%

ACHIEVEMENTS

- Winner — Brand Builder Battle (Ventura, Goa)** - Led development of HerbalEase
- Finalist — Level Supermind Hackathon (Mumbai)**

- **Finalist — MumbaiHacks 2025**
- **3rd Place — TechYothon (AITD)** - AI-powered campus safety system
- **Recognition — Computer Vision Expo 2024 (Ready Tensor)** - ProctoringAI project
