PROFESSIONAL SUMMARY

Highly motivated Computer Engineering undergraduate with strong communication and interpersonal skills, eager to apply analytical abilities to a Recruiting Intern role. Possessing a basic understanding of the recruitment cycle, adept at screening information, coordinating tasks, maintaining organized pipelines, and supporting efficient hiring activities to meet targets.

TECHNICAL SKILLS

Languages: Python, JavaScript, Go, PHP, Java, C, C++
AI/ML & Computer Vision: TensorFlow, OpenCV, MediaPipe, FER, Scikit-learn, Hugging Face
Backend & Databases: REST APIs, SQL, Flask, Node.js, MySQL, PostgreSQL, Firebase
Frameworks & Tools: React.js, Next.js, HTML, CSS, Flutter, React Native, Git, Linux, Data Structures & Algorithms, System Design Basics

EXPERIENCE

Software Development Intern July 2023 – Oct 2023
Infipre IT Services (OPC) Pvt. Ltd

- Collaborated effectively in an agile environment, contributing to feature development and testing, demonstrating strong teamwork and coordination skills.
- Managed and organized project components, ensuring efficient development and deployment cycles, analogous to maintaining candidate pipelines.
- Enhanced user experience and system validation, showcasing attention to detail and problem-solving abilities relevant to candidate screening.

Software Engineering Intern 2024
Vyom Solutions

- Adhered strictly to production-level coding standards, demonstrating meticulous attention to detail and commitment to quality, essential for accurate candidate data management.
- Provided crucial support in debugging and deployment, showcasing problem-solving skills and ability to ensure smooth operational processes.
- Contributed to feature implementation, highlighting ability to follow requirements and contribute to project completion, similar to meeting hiring targets.

KEY PROJECTS

Open-Source AI Proctoring System Jan 2024 – Present
Technologies: TensorFlow, OpenCV, MediaPipe, FER

- Developed a real-time system requiring meticulous attention to detail and accurate data processing, skills transferable to screening resumes and candidate information.
- Integrated complex components and optimized performance, demonstrating strong organizational and problem-solving capabilities.
- Managed a multi-faceted project from conception to optimization, highlighting ability to coordinate tasks and meet project objectives.

AI-Powered Website Generator — CodeCraft AI 2024
Technologies: LLMs, Flask, React

- Designed and implemented a platform to translate user requirements into functional outputs, showcasing strong analytical and communication skills.
- Managed backend processes and data flow, demonstrating organizational skills crucial for maintaining candidate pipelines.
- Focused on delivering solutions based on specific needs, akin to understanding job requirements and matching candidates.

ArogyaYaan — Medical Supply Chain System (Mumbai Hacks 2025) Nov 2025
Technologies: Go (Gin), PostgreSQL (Supabase), Next.js, React Native

- Developed a comprehensive platform to track and manage critical resources, highlighting strong organizational and logistical capabilities.
- Integrated an AI agent and built a mobile application for real-time updates, demonstrating ability to coordinate complex systems and facilitate communication.
- Managed project timelines and deliverables under pressure (hackathon setting), showcasing ability to meet deadlines and targets.

EDUCATION

Goa Engineering College — Government of Goa July 2024 – July 2027
Bachelor of Engineering (B.E.) in Computer Science SGPA: 8.5
Government Polytechnic Panaji 2021 – 2024
Diploma in Computer Engineering 91.4%

ACHIEVEMENTS

- **Winner — Brand Builder Battle (Ventura, Goa)** - Led development of HerbalEase
- **Finalist — Level Supermind Hackathon (Mumbai)**
- **Finalist — MumbaiHacks 2025**
- **3rd Place — TechYothon (AITD)** - AI-powered campus safety system
- **Recognition — Computer Vision Expo 2024 (Ready Tensor)** - ProctoringAI project
